Abstracts

Polyimide refers to a class of synthetic polymers. Adding polyimide produces a PTFE compound that is lower in friction than all of those previously described. It is non-abrasive, making it a good choice for applications involving softer mating surfaces like steel, aluminium, or other plastics. Polyimide filled PTFE therefore suits dry running and stop-start applications particularly well. However, polyimide is the priciest of the PTFE fillers.

According to our (Global Info Research) latest study, the global Polyimide-Filled PTFE market size was valued at USD 74 million in 2022 and is forecast to a readjusted size of USD 128.7 million by 2029 with a CAGR of 8.3% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Global key polyimide-filled PTFE ???? Omniseal Solutions, Ensinger Holding, Balseal etc. The top 6 companies hold a share about 93%. Europe is the largest market, with a share about 78%, followed by Asia-Pacific and North America with the share about 12% and 9%. In terms of product, polyimide 10%-20% is the largest segment, with a share over 84%. And in terms of application, the largest application is mechanical, followed by food processing and medical.
