According to our (Global Info Research) latest study, the global PolyJet 3D Printing Service market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

PolyJet is one of the fastest and most accurate 3D printing technologies out there. This resin-based method can produce highly detailed parts in a matter of hours. Better yet, it can create parts with multiple materials and up to half a million colors. But PolyJet printers and materials can be very expensive — for example, some resins can cost up to \$350 per kilogram. Getting your own PolyJet printer requires a significant investment that smaller companies in particular, can ill afford. This makes on-demand PolyJet 3D printing services an attractive solution. They allow manufacturers, businesses, or individuals to get their hands on affordable, photorealistic parts, prototypes, and small batches of end-use products. They're also a great way to try out PolyJet printing before committing to buying a machine.
