Abstracts

Plastics offer many advantages over other common bearing materials. Plastics are extremely corrosive resistant and most are chemically resistant.

Plastic bearings do not transfer heat to other areas of the mechanical assembly. Many plastics are even self-lubricating and therefore eliminate the possibility of failures from lack of maintenance.

Scope of the Report:

This report focuses on the Polymer Bearing in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The Asia-Pacific region led the global polymer bearing market in 2017, owing to the rise in demand for polymer bearings from varied end-use industries such as automobile, textile, food processing, medical & pharmaceutical, packaging, and chemical in this region.
