Polymer cement waterproof slurry is a waterproof coating made of cement, polymer and other additives, mainly used for waterproofing on the surface or structure of buildings. Through the reinforcing effect of the polymer component, the adhesion, flexibility and crack resistance of the coating are improved, making it superior to traditional cement in waterproof performance. Polymer cement waterproof slurry can be widely used in basements, toilets, roofs, balconies and other areas susceptible to water penetration. It has good anti-penetration, weather resistance and durability, can effectively prevent moisture penetration, and protect building structures from moisture and water damage.
