According to our (Global Info Research) latest study, the global Polymer Lightning Arrester market size was valued at US\$ 442 million in 2024 and is forecast to a readjusted size of USD 585 million by 2031 with a CAGR of 4.2% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A polymer arrester is a type of surge protector that uses a polymer shell (usually silicone rubber or EPDM) instead of a traditional ceramic shell to protect electrical systems from damage. It still uses a metal oxide varistor (MOV) inside to absorb surge energy and safely discharge it to the ground. The polymer shell material makes it lighter, safer, and more durable than a ceramic arrester.
