Abstracts

The global Polymer Modified Asphalt market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In Europe and Asia, 5 largest manufacturers of Polymer Modified Asphalt are Total Bitumen, Nynas, Gazprom Neft PJSC, Shell and ExxonMobil, which make up over 10%. Among them, Total Bitumen is the leader with about 24% market share. In terms of product type, SBS Modified Asphalt occupies the largest share of the total market, about 62%. And in terms of product Application, the largest application is Road Construction & Paving, followed by Roofing.

Polymer Modified Asphalt has high elasticity and thermal stability. An asphalt concrete surface based on PMB is highly resistant to the formation of ruts, withstands high traffic loads, and is crack-resistant at low temperatures. There are three main components in PMB production. Firstly, conventional asphalt is used as a base. Secondly, there is a plasticizer which gives the bitumen plasticity and improves dilution of the polymer. And the third component is the polymer itself. The process used to produce PMB involves mixing these three components using a specific production process.

This report studies the global Polymer Modified Asphalt production, demand, key manufacturers, and key regions.
