The global Polyoxypropylenediamine market size is expected to reach \$ 608 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032). Global sales of Polyoxypropylenediamine was about 163 k tons in 2025 with average price of 2759 USD/ton. The average gross margin of the industry is between 10%-15%. Propylene oxide and propylene glycol are among its primary raw materials.

Polyoxypropylenediamine is a difunctional amine-terminated polyether with a polyoxypropylene backbone and primary amine groups at both molecular chain ends. It is typically produced by amination of polypropylene glycol or polyoxypropylene ether, combining the flexibility and low viscosity of polyether segments with the high reactivity of terminal amine groups.
