Polypropylene filter bag is a bag-shaped filter element made of polypropylene material. It has good chemical stability, high temperature resistance and mechanical strength, and can maintain filtering effect in a variety of corrosive environments. Polypropylene filter bag has high filtering efficiency, can effectively remove solid and soft particles, and has loose fiber structure and strong impurity carrying capacity. Its advantages are high-temperature surface heat treatment and unique structural design, which effectively prevent fiber shedding and filter hole clogging, extend service life, maintain low pressure difference and flow rate, and improve the continuity and stability of the filtering process.
