## Abstracts

Polypropylene strapping is the lightest and most economical strapping material. It is commonly used for light- to medium-duty applications such as carton closing, paper or newsprint bundling, and bailing or unitizing lightweight materials and products. It is easy to work with, very flexible, and resistant to water and corrosive liquids. It also has a high elongation rating (meaning it's pretty stretchy), which allows it to withstand shocks and move with a load without breaking.

According to our (Global Info Research) latest study, the global Polypropylene Strapping Materials market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
