According to our (Global Info Research) latest study, the global Polypropylene Thermoplastic Vulcanizate market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

A thermoplastic elastomer made from rubber and thermoplastic polyolefin by dynamic full curing of polypropylene with a curing agent. Because rubber particles (1~5 microns) maintain a reticular structure and exhibit elasticity at both room temperature and processing temperature, thermoplasticity and strength are provided by polyolefin, so their strength, elasticity and heat resistance are better than those of dynamic partially vulcanized thermoplastic polyolefin.
