The global Polysulfide Modified Epoxy Resin market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Polysulfide modified epoxy resin is a type of resin that combines the properties of both polysulfides and epoxy resins. It is commonly used in construction, marine, and aerospace industries due to its excellent chemical and physical properties. The modification of the epoxy resin with polysulfide improves its flexibility, impact resistance, and adhesion properties. The cured material is tough, resilient, and able to withstand exposure to harsh environments, including chemicals, water, and temperature extremes.
