According to our (Global Info Research) latest study, the global Polyurea Coatings market size was valued at USD 762.1 million in 2023 and is forecast to a readjusted size of USD 864.6 million by 2030 with a CAGR of 1.8% during review period.

Polyurea coating is that derived from the reaction product of an isocyanate component and a resin blend component. It has a composition which is a combination of the above-mentioned two coating systems. The isocyanate component can be the same as for the “pure” polyurea systems. The resin blend is a blend of amineterminated and hydroxyl-terminated polymer resins and/or chain extenders. The resin blend may also contain additives, or non-primary components. To bring the reactivity of the hydroxyl-containing resins to the same level of reactivity as the amine-terminated resins, the addition of one or more catalysts is necessary.

SPI, Versaflex, PPG Industries, Polycoat Products and Krypton Chemical are the leaders of the Polyurea Coatings industry, which take about 25% market share.
