## Abstracts

According to our (Global Info Research) latest study, the global Polyurethane Additives market size was valued at USD 2070.9 million in 2023 and is forecast to a readjusted size of USD 2625 million by 2030 with a CAGR of 3.4% during review period.

Polyurethane consists of organic components connected by urethane links. The majority of polyurethanes available are thermosetting polymers that do not melt at high temperatures. Polyurethane is conventionally utilized and is produced with the help of a polyol and di or polyisocyanate.

Polyurethane additives are the chemical substances that are used in small quantities to enhance the properties of foams, adhesives, sealants, coatings, elastomers, and binders.

Asia-Pacific region is dominant in the polyurethane additive market. The rising demand for polyurethane additives in this region is mainly driven by its increased use in building & construction industries. Europe is the second-largest consumer of polyurethane additives, globally. The market in this region is mainly driven by the growing opportunities from transportation and construction industries. The Middle East & Africa is the second fastest-growing market, due to the increased demand for rigid foam for insulation purposes in the region.
