## Abstracts

The global Polyurethane Mortar Floor Coating market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Polyurethane floor refers to the use of polyurethane floor coating combined with a new solvent-free or water-based, non-pollution ground functional construction technology to make a decorative floor that can meet certain specific use requirements. Polyurethane flooring is mainly a substitute for epoxy. It is a new generation of flooring that is more wear-resistant, flexible and easy to construct. The flooring can meet the usage requirements within 2 hours of construction, which completely changes the time issue that enterprises worry about when renovating floors.
