Polyurethane paving materials are elastic surface materials made from polyurethane resins, offering excellent flexibility, wear resistance, slip resistance, and weather resistance. These materials are commonly used in sports fields, playgrounds, tracks, and other surfaces where durability, cushioning, and slip resistance are required. Due to the strength and elasticity of polyurethane, this paving material maintains high performance over extended use and effectively reduces impact injuries during activities. Additionally, polyurethane paving materials provide UV resistance and anti-aging properties, making them suitable for both indoor and outdoor applications.
