Polyurethane sealants are a type of sealants that are formulated using polyurethane polymers. They are designed to provide a flexible and durable seal between various substrates, such as metals, plastics, concrete, wood, and glass.

Polyurethane sealants are known for their excellent adhesion properties, which allow them to bond strongly to a wide range of surfaces, creating a watertight and airtight seal. They can accommodate slight movements and expansion and contraction of materials, making them suitable for applications where flexibility is required.
