Abstracts

According to our (Global Info Research) latest study, the global PON Aggregation Extender market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The PON aggregation extender supports multiplexing and demultiplexing between xPON interface and OTU2 interface through powerful FPGA algorithm and mature OTN (Optical Transport Network) technology, and multiplexes multiple PON ports to one OTU2 interface to extend the optical transmission distance. The plug-and-play feature ensures that telecom operators and ISPs can deploy on the basis of the existing optical distribution network (ODN) to achieve less fiber investment and more network coverage.
