Poria cocos powder is a natural powder made from the dried sclerotia of Poria cocos, a traditional edible and medicinal fungus. Its core function is as a food-medicine homology ingredient, addressing issues such as edema, indigestion, and restlessness caused by water retention and spleen deficiency. With its key diuretic, spleen-strengthening, and calming effects, it provides a gentle and safe conditioning solution in traditional Chinese medicine formulas and modern health products. The upstream process mainly involves agricultural planting and primary processing, concentrated in the traditional Poria cocos producing areas, including pine cultivation management, Poria cocos spore inoculation, sclerotia harvesting and cleaning, peeling, drying, and primary grinding. The downstream process involves deep processing and application. Pharmaceutical factories, health product companies, and food manufacturers purchase Poria cocos powder and process it into prepared Chinese medicinal slices, proprietary Chinese medicines, health capsules, solid beverages, or functional foods, ultimately reaching consumers through medical institutions, pharmacies, and supermarkets. In 2025, the output of Poria cocos powder is about 6,000 tons, with an average price of about US\$30 per kilogram, a gross profit margin of about 35%, and a single production line capacity of about 150 tons per year.
