## Abstracts

According to our (Global Info Research) latest study, the global Port Machinery market size was valued at USD 18780 million in 2023 and is forecast to a readjusted size of USD 21300 million by 2030 with a CAGR of 1.8% during review period.

Port Machinery used primarily to handle 40 or 20 foot equivalent unit (TEU) in port warehouses and terminals: Equipment such as cargo—forklift, conveyor systems, ship-to-shore cranes, automated guided vehicles, straddle carriers, reach stackers, empty cargo handlers, Rail Mounted Gantry (RMG) cranes, Rubber Tire Gantry (RTG) cranes, mobile harbor cranes, and terminal tractors are considered in this market study. This equipment usually handles containerized or non-containerized cargo, which can weigh up to approximately 400 tons depending on the usage.

The maritime sector is at a major crossroads in terms of its future. The electrification and automation of ports are receiving significant attention globally with the majority of the largest ports in the world preparing or already implementing such programs. Manufacturers and ports must accelerate the introduction of new technologies to realize global net-zero targets and achieve carbon neutrality. Many leading port equipment manufacturers and ports are actively buying electric equipment despite its higher price than diesel equipment.
