According to our (Global Info Research) latest study, the global Porta Potti market size was valued at USD 1058.3 million in 2023 and is forecast to a readjusted size of USD 1719.2 million by 2030 with a CAGR of 7.2% during review period.

A porta potti or portable toilet is a self-contained waterless toilet system that can be installed and ready to use in less than a minute. Users only need to open the container's lid to access the inner plastic bowl, which holds the dirt until they solidify into small fecal-like masses. These volumes are easily removable thanks to an integrated air vent at the bottom.

Factors such as the rapid growth of the industrial & commercial sector and the improvement of the GDP of developing economies will drive the development of the portable toilet market during the forecast period. In addition, increased investment in various sectors and efforts have been made to improve the country's deficit situation, further boosting the market's growth. In addition, improving consumers' quality of life and increasing renovation activities among old construction sites will increase the market footprint. However, rising geopolitical tensions are expected to hamper the supply chain, thus limiting market growth over the forecast period.
