The global Portable Auto Air Conditioner market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A portable auto air conditioner is a small, stand-alone air conditioning unit designed for use in vehicles that do not have built-in air conditioning systems. These units are typically powered by a 12-volt DC power supply and can be easily plugged into the cigarette lighter socket in a car or truck. Portable auto air conditioners work by pulling in warm air from the vehicle and cooling it using a refrigerant gas. The cooled air is then blown back into the vehicle using a fan. The unit is typically mounted on the dashboard or rear parcel shelf, and may be secured in place using brackets or straps.
