The global Portable Marine VHF Radio market size is expected to reach \$ 151.8 million by 2029, rising at a market growth of 4.0% CAGR during the forecast period (2023-2029).

A portable Marine VHF radio is a compact, handheld communication device designed for use on boats and other watercraft. It offers the same essential features and functions as fixed-mount VHF radios but in a portable form factor. Portable Marine VHF radios are battery-powered, making them convenient for use on smaller vessels or for boaters who require mobility. They typically have a range of several miles, allowing for communication with other vessels, marinas, and authorities. These radios are equipped with channels dedicated to marine communication and often include additional features such as weather channels, emergency functions, and waterproof construction to withstand exposure to water and harsh marine conditions. Portable Marine VHF radios are an important safety tool for boaters, providing a reliable means of communication on the water.
