The global Portable Oxygen Concentrators market size is expected to reach \$ 3390 million by 2032, rising at a market growth of 13.0% CAGR during the forecast period (2026-2032).

An oxygen concentrator is a medical device which is designed to deliver a concentrated flow of oxygen to a patient. Portable oxygen concentrators are small, lightweight and more convenient for the patients.

In fact, oxygen concentrators are rather simple devices. They operate on the principle of 'rapid pressure swing adsorption' of atmospheric nitrogen onto specific minerals and then venting the nitrogen. The filtered gas mixture is mainly oxygen and little other gasses like argon and CO₂.

The main market for portable oxygen concentrators is the United States, which accounts for about 40% of the total market, followed by Europe, which accounts for 25%.

The major players are Invacare, Inogen, Chart (Airsep) and Philips, with the top three accounting for about 50% of the market.

This report studies the global Portable Oxygen Concentrators production, demand, key manufacturers, and key regions.
