According to our (Global Info Research) latest study, the global Portable Radar Speed Sign market size was valued at US\$ 83.4 million in 2025 and is forecast to a readjusted size of US\$ 107 million by 2032 with a CAGR of 3.6% during review period.

A Portable Radar Speed Sign is a mobile, self-contained electronic device designed to display the speed of approaching vehicles using radar technology to promote safe driving behavior. These signs are commonly used in school zones, construction areas, residential streets, and temporary traffic enforcement sites. They typically feature a digital LED or LCD display, radar speed detection, and optional data logging, solar power capability, or remote connectivity for traffic monitoring. Easily mounted on tripods or trailers, portable radar speed signs are valued for their high visibility, flexibility, and ease of deployment, serving as an effective, non-intrusive tool to reduce speeding and enhance road safety.

The portable radar speed sign market is a niche yet growing segment within traffic management and road safety solutions, driven by increasing global emphasis on reducing speeding and enhancing pedestrian and driver safety. These battery- or solar-powered units display real-time vehicle speeds using radar detection, alerting drivers when they exceed speed limits, particularly in school zones, residential areas, and work zones. Market growth is supported by smart city initiatives, government traffic-calming programs, and the integration of data collection features that assist in traffic analysis. Key players include All Traffic Solutions and Radarsign, offering signs with advanced features like Bluetooth connectivity, cloud data management, and remote programming. The market is expected to expand steadily, especially in urban and municipal deployments.
