## Abstracts

According to our (Global Info Research) latest study, the global Portable Toilets for Camping market size was valued at US\$ 544 million in 2025 and is forecast to a readjusted size of US\$ 876 million by 2032 with a CAGR of 7.1% during review period.

Portable toilets for camping are compact, self-contained sanitation units designed for outdoor use in camping, recreational vehicle (RV) travel, hiking expeditions, and remote locations where fixed plumbing infrastructure is unavailable. These products typically include flushable chemical toilets, gravity-based holding tank systems, composting toilets, and foldable bucket-style units. Compared with construction-site portable toilets, camping models prioritize lightweight structure, ease of transport, odor control systems, sealed waste tanks, and water-efficient flushing mechanisms. From a value chain perspective, upstream includes high-density polyethylene (HDPE), polypropylene materials, sealing components, pumps, valves, deodorizing chemicals, and molded plastic parts; midstream focuses on injection molding, tank assembly, sealing system integration, quality inspection, and packaging; downstream demand comes from outdoor equipment retailers, RV manufacturers, e-commerce platforms, camping enthusiasts, disaster preparedness buyers, and rental service providers. In 2025, the average selling price of portable camping toilets is approximately US\$115 per unit, with global sales volume reaching around 4.60 million units. The industry maintains a gross margin of 25%–40%, supported by recreational lifestyle trends and seasonal outdoor activity growth.

The growth of outdoor recreation and van-life culture is driving steady demand for compact sanitation solutions. Lightweight and eco-friendly composting models are gaining popularity among environmentally conscious consumers. Online retail channels

are becoming a primary sales channel, especially in North America and Europe. Manufacturers are improving leak-proof design and odor control performance to enhance user experience.
