## Abstracts

According to our (Global Info Research) latest study, the global Portable Total Phosphorus Detector market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The total phosphorus analyzer is suitable for the detection of surface water, groundwater, industrial wastewater, domestic wastewater and other water quality. Digest the sample with potassium persulfate (or potassium nitrate-perchloric acid) under neutral conditions. All the phosphorus contained is oxidized to orthophosphate. In an acidic medium, orthophosphate reacts with ammonium molybdate to generate phosphomolybdate heteropolyacid in the presence of antimony salt, which is immediately reduced by ascorbic acid to form a blue complex.
