According to our (Global Info Research) latest study, the global PolySwitch Resettable Devices market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

PolySwitch Resettable Devices are Polymeric Positive Temperature Coefficient (PPTC) devices that offer a resettable overcurrent protection alternative, thereby reducing warranty, service, and repair costs. PTCs increase resistance as temperature increases due to increased flow. The components are designed to limit unsafe currents while allowing constant safe current levels, resistance will 'reset' automatically when the fault is removed and temperature returns to safe levels
