The global Positive-pressure Needleless Connectors market size is expected to reach \$ 1146.6 million by 2030, rising at a market growth of 6.1% CAGR during the forecast period (2024-2030).

Positive-pressure needleless connectors are medical devices used to facilitate the connection and disconnection of intravenous tubing without the need for needles. They feature a valve mechanism that opens to allow fluid flow when engaged with compatible tubing, and closes when disconnected to prevent leakage and contamination. These connectors help reduce the risk of needlestick injuries and bloodstream infections, improving patient safety during medical procedures such as intravenous therapy and medication administration.
