Abstracts

Potassium acetate (KCH_3COO) is the potassium salt of acetic acid. It is white flakes or crystalline powder and also used in industry, pharma, food additives, deicing, and others.

Potassium salts are common to be sold in aqueous solution form. Correspondingly, potassium acetate is usually sold as aqueous solution, especially in deicing and drilling fluid industries. In our report, the amount of all liquid products is converted to amount of pure solid potassium acetate.

Scope of the Report:

This report focuses on the Potassium Acetate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Potassium acetate is used in a wide variety of industrial applications. The major uses are in the production of catalyst, oil drilling, pharma & food and deicing, etc. Industrial usage is the main application of potassium acetate, accounting 38.63% of the global consumption, while deicing is the major application of potassium acetate in North America.

Due to the impact of raw material prices, prices of potassium acetate keep decreasing, although during this period increased slightly, but still it can't change the overall downward trend in prices, the average price in globe from 2082 USD / MT in 2010 reduced to 1876 USD / MT in 2015.

In the next few years, due to the gradual recovery of the global economy, the downstream market demand will grow slowly. Consequently, we believe the world production of potassium acetate in the coming years will reach 84578 MT in 2022.

Although sales of potassium acetate brought a lot of opportunity, the study group recommends the new entrants just having money but without technical advantage and downstream support do not enter into the potassium acetate field.

The worldwide market for Potassium Acetate is expected to grow at a CAGR of roughly 0.6% over the next five years, will reach 150 million US\$ in 2023, from 140 million US\$ in 2017, according to a new GIR (Global Info Research) study.
