According to our (Global Info Research) latest study, the global Potassium Phosphite market size was valued at USD 107 million in 2023 and is forecast to a readjusted size of USD 137.4 million by 2030 with a CAGR of 3.6% during review period.

The chemical formula of potassium phosphite is H_2KO_3P . Various products containing potassium phosphite are sold as either fertilizers to address potassium deficiencies, or as fungicide products to manage specific disease issues. Potassium phosphite has the unique property of increasing resistance against several disease and environmental stress issues by boosting both the rate and intensity of the existing plant defense systems. Potassium phosphite is a soil applied material that has recently gained attention as a method for improving plant vigor and health. Research and field experience have shown that this improvement of plant health after application of potassium phosphite is related to an increase in resistance against a variety of plant pathogens, as well as increased tolerance of many environmental stress factors, including drought stress.

Global Potassium Phosphite key players include Van Iperen, Haifa Group, Luxembourg-Pamol, etc. Global top three players hold a share about 52%.
