Powder-free stretch vinyl synthetic gloves are a type of disposable hand protection commonly used in various industries, including healthcare, food service, and general sanitation. These gloves are crafted from a synthetic form of polyvinyl chloride (PVC) that offers a stretchable and flexible fit, ensuring comfort and ease of movement. What distinguishes these gloves as 'powder-free' is the absence of powder, typically cornstarch or other substances, often used in the manufacturing process to facilitate easier donning. The elimination of powder helps reduce the risk of allergic reactions and respiratory issues associated with powdered gloves. Powder-free stretch vinyl synthetic gloves provide a reliable barrier against contaminants, making them suitable for tasks where hygiene and hand protection are crucial. Their synthetic composition makes them latex-free, addressing concerns related to latex allergies. These gloves are designed for single-use applications, offering convenience and a cost-effective solution for environments requiring disposable hand protection with enhanced stretchability.
