Abstracts

The global Powder Metallurgy market size is expected to reach \$ 10690 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Powder metallurgy (PM) refers to processes by which materials or components are made from metal powders. PM processes can avoid, or greatly reduce, the need to use metal removal processes, thereby drastically reducing yield losses in manufacture and often resulting in lower costs. Powder metallurgy is also used to make unique materials impossible to melt or form in other ways.

Global Powder Metallurgy main players are GKN, Sumitomo Electric Industries, Hitachi Chemical, Fine Sinter, etc. Global top four manufacturers hold a share over 25%. North America is the largest market, with a share nearly 40%.

This report studies the global Powder Metallurgy production, demand, key manufacturers, and key regions.
