A power battery pole sheet roller press machine, often referred to as a battery electrode roller press, is a critical piece of equipment used in the manufacturing of lithium-ion batteries and other types of rechargeable batteries. This machine is specifically designed for the compaction of electrode materials (cathode or anode) onto current collectors, typically in the form of thin metal foils (like aluminum for cathodes and copper for anodes). The pressing process is vital for ensuring uniformity, density, and adherence of the active material, which directly impacts the battery's performance and lifespan.
