Abstracts

The global Power Connector market size is expected to reach \$ 3442 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

Power connector is electrical interface products used to establish safe and reliable power connections between power sources, power cables, power adapters, charging devices or battery systems and electronic equipment, industrial equipment and electrical systems. Their core function is to transmit current and voltage and provide stable power supply for equipment or systems, while meeting relevant safety and reliability requirements in terms of rated voltage, rated current, dielectric strength, temperature rise control, mechanical locking, mis-mating prevention, protection rating and mating cycle life.

These products come in various forms, including AC mains plugs, sockets, power strips and IEC power entry interfaces used in daily household and commercial scenarios; DC power interfaces and USB power connectors used in laptops, small electronic devices and portable equipment; as well as circular multi-pin connectors, rectangular or modular connectors and high-current power connectors used in industrial equipment, outdoor equipment, instruments, energy storage batteries and charging systems. Different types of power connectors are usually designed and classified based on application scenarios, rated voltage, current capacity, interface standards, physical structure and protection performance, and must comply with IEC, NEMA and relevant national or regional electrical standards to ensure safety, compatibility and long-term stable operation across different devices and operating environments.

In 2025, global production reached 4.18 billion units, with an average selling price of USD 0.59 per unit.

Asia-Pacific is the largest Power Connector market with about 32% market share. North America is follower, accounting for about 29% market share. The key players are TE Connectivity, Molex, Amphenol etc. Top 3 companies occupied about 31% market share.
