Abstracts

The global Power Cords & Extension Cords market size is expected to reach \$ 4910 million by 2032, rising at a market growth of -1.5% CAGR during the forecast period (2026-2032).

Extension cords, also known as power extenders or extension leads, are longer power cords that are used to supply electrical energy to portable electrical equipment or appliances located up to hundreds of feet away from a main power source.

Equipment such as construction machinery, sound and lighting equipment, emergency medical defibrillators and electrical power tools are often used in locations without a convenient power source, and extension cords are thus used to supply the current to the equipment. Extension cords are only designed for temporary usage, and not as a means of permanent or long-term power supply.

Global Power Cords & Extension Cords key players include Volex, Longwell, I-SHENG, Electri-Cord, HL TECHNOLOGY, Quail Electronics, etc. Global top six manufacturers hold a share over 18%.

China is the largest market, with a share about 55%, followed by North America and Europe, both have a share over 25 percent.

In terms of product, PVC and Rubber is the largest segment, with a share about 80%. And in terms of application, the largest application is Computers and consumer electronics, followed by Household appliances, Medical Devices and Other Industrial Products, etc.
