## Abstracts

The global Power Grid Uninterrupted Mobile Work Vehicle market size is expected to reach \$ 1516 million by 2032, rising at a market growth of 5.3% CAGR during the forecast period (2026-2032).

In 2025, global production of power grid uninterrupted mobile work vehicles reached 9,160 units, with an average selling price of US\$112,000 per vehicle. Power grid uninterrupted mobile work vehicles are specialized vehicles used for live-line maintenance, bypass power transfer, emergency power supply, or rapid power restoration of power transmission and distribution lines and equipment. They integrate insulated high-altitude work devices, bypass access systems, mobile power systems, or related safety control devices, enabling workers to complete maintenance, modification, and emergency repair operations with minimal or no power outages. They are widely used in power systems, covering the maintenance and repair of distribution, generation, transmission, and substation systems. The upstream of the industry chain mainly includes core components such as vehicle chassis, diesel generator sets, insulation materials, and control systems; the midstream consists of specialized vehicle manufacturers with vehicle integration and manufacturing capabilities; and the downstream mainly consists of end-users of the power system, such as the State Grid and China Southern Power Grid. Gross profit margin is in the range of approximately 20%-35%.
