## Abstracts

The global Power Over Ethernet (POE) Lighting market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Power over Ethernet (PoE) uses Ethernet cable networks to transmit power and data through one cable. Ethernet is a tested and trusted solution for transmitting data and low-voltage direct current (DC) power for everything from phone systems to cameras. PoE LED lights use the DC power from the Ethernet cable and eliminate the regularly required alternating current (AC) to DC conversion within each luminaire. As a result, less power is lost, making PoE lighting more energy efficient.

In North America, Cisco Systems, Cree, Philips Lighting, Molex and Innovative Lighting are the leaders of the Power Over Ethernet (POE) Lighting industry. The top 3 take about 46% market share.

This report studies the global Power Over Ethernet (POE) Lighting demand, key companies, and key regions.
