## Abstracts

According to our (Global Info Research) latest study, the global Power Plants Air-Cooled Condenser market size was valued at USD 482.6 million in 2022 and is forecast to a readjusted size of USD 611.7 million by 2029 with a CAGR of 3.4% during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Air-cooled condensers in power plants play a critical role in the efficient and sustainable operation of the facility. These condensers, by utilizing ambient air for cooling, help in the condensation of exhaust steam from the turbine, thereby converting it back into water for reuse in the power generation process. Their integration allows power plants to operate without relying on large quantities of water, making them particularly valuable in regions where water scarcity or environmental concerns are prevalent.
