A Power Supply Unit (PSU) Denuder refers to a device or component used in the field of air pollution control. It is specifically designed to remove and neutralize acidic gases, such as sulfur dioxide (SO₂) and nitrogen oxide (NO_x), from power plant emissions. The denuder operates by utilizing a chemical reaction process or absorbent material to capture and eliminate the acidic gases present in the power plant flue gas. By removing these harmful pollutants, the denuder helps to reduce air pollution and minimize the environmental impact of power generation.
