## Abstracts

Power take-off (PTO) is a device that transfers an engine's mechanical power to another piece of equipment. A PTO allows the hosting energy source to transmit power to additional equipment that does not have its own engine or motor. For example, a PTO helps to run a jackhammer using a tractor engine. The power take-off is mainly used for dump trucks, fire trucks, cement mixer trucks, refrigerated trucks and other special vehicles that require additional power.
