Abstracts

Power take-off (PTO) is a device that transfers an engine's mechanical power to another piece of equipment. A PTO allows the hosting energy source to transmit power to additional equipment that does not have its own engine or motor. For example, a PTO helps to run a jackhammer using a tractor engine. The power take-off is mainly used for dump trucks, fire trucks, cement mixer trucks, refrigerated trucks and other special vehicles that require additional power.

This report studies the global Power Take Off (PTO) production, demand, key manufacturers, and key regions.
