The global Powered Cable Puller market size is expected to reach \$ 1523.9 million by 2029, rising at a market growth of 4.0% CAGR during the forecast period (2023-2029).

Cable pullers are heavy duty tools for electrical and cable installations. They are used to thread cables through conduit or other tight spaces and are equipped with a ratchet mechanism for easy handling. Cable pullers are also used to tension cables, such as those used to support overhead power lines. It can be manual or electric and is used in many industries including construction, telecommunications and transportation. The growth of the global cable puller market can be attributed to the rising demand for cable pullers for applications in the construction industry, railway industry, bridge industry, and others. In addition, rising demand for electric vehicles is also driving the growth of the global cable retractor market. The railway industry is expected to be one of the fastest-growing application industries during the forecast period owing to the increasing demand for high-speed trains, especially in emerging countries such as China, India, and Japan. The bridge industry also has great growth potential, especially in developing regions such as Asia Pacific, Middle East & Africa, owing to increasing infrastructure spending. Moreover, new technologies to improve existing designs are likely to further drive demand in the coming years.

The Powered cable puller is an easy-to-use cable puller designed to accept industry standard pulleys 9', 24', 30' or 40' diameter to pull cables through conduit.
