The PP caster refers to a caster wheel made from polypropylene (PP) material. Caster wheels are essential components used in various applications to enable smooth and efficient mobility of objects and equipment. PP casters are known for their lightweight yet durable construction, making them suitable for a wide range of environments. These caster wheels offer resistance to corrosion, moisture, and chemicals, which makes them ideal for applications in laboratories, healthcare settings, food service, and industries where cleanliness and hygiene are paramount. PP casters come in various sizes, load-bearing capacities, and designs to meet specific requirements for mobility and support.

The industry trend associated with PP casters involves a growing emphasis on lightweight and versatile caster solutions. As industries evolve and focus on optimizing logistics, there is an increasing demand for caster wheels that provide mobility with minimal effort and noise.
