According to our (Global Info Research) latest study, the global PP Non-woven Fabric market size was valued at USD 14240 million in 2023 and is forecast to a readjusted size of USD 18520 million by 2030 with a CAGR of 3.8% during review period.

PP nonwoven fabric is a thermoplastic material with excellent comprehensive performance; moreover, it is small in density, easy to produce and has low production costs. However, it also has some defects, such as a low melting point, low thermal deformation temperature, poor creep-resistant performance, poor dimensional stability, low temperature brittleness, etc.

On the other hand, PP nonwoven fabric itself is resistant to erosion by mildew, but it cannot directly kill it. Furthermore, its side-chain polymers have flexible molecule chains and are non-polar, with the latter attribute making it difficult to blend with other polymers, and the weak molecule combination making its heat resistance poor. Thus, in order to expand the functions of PP nonwoven fabrics, it is necessary to modify and process it.

Global PP Non-woven Fabric main players include AVINTIV, Kimberly-Clark, AVGOL, First Quality, Toray, etc., totally accounting for about 22% of market. Europe is the largest market of PP Non-woven Fabric, with a share over 21%.
