PP recycled pellet refers to small plastic pellets made from recycled polypropylene (PP) material. PP is a thermoplastic polymer widely used in various industries such as packaging, automotive, construction, and textiles. The production of PP recycled pellets starts with collecting and sorting post-consumer or post-industrial waste materials made of PP. The waste materials are then cleaned, shredded, and melted down into a liquid state. The molten PP is extruded through a die to form small cylindrical shapes, which are then cooled and cut into small pellets.
