PP (Polypropylene) shrink film is a type of plastic film that is commonly used for packaging and wrapping applications. It is made from polypropylene, a thermoplastic polymer known for its high clarity, strength, and heat-shrinkable properties.

When heated, the PP shrink film shrinks tightly around the product or package, conforming to its shape and providing secure and tamper-evident protection. The shrinkage process occurs due to the film's ability to retract when exposed to heat, typically using hot air or heat tunnels.
