According to our (Global Info Research) latest study, the global PP/PE/PLA/PET Sheet Extrusion Production Line market size was valued at US\$ 1161 million in 2025 and is forecast to a readjusted size of US\$ 1798 million by 2032 with a CAGR of 6.6% during review period.

In 2025, the global production of PP/PE/PLA/PET sheet extrusion production lines reached 6,270 units, with an average selling price of US\$180,000 per unit. Essentially, a PP/PE/PLA/PET sheet extrusion production line is a complete line of equipment that continuously manufactures sheets from plastic resin granules, recycled materials, or recycled sheet scraps through feeding, drying/crystallization (depending on the material system), extrusion plasticizing, melt filtration, metering and pressure stabilization, T-die forming, calendering and thickness setting, cooling, traction, slitting, and winding, or directly connected to a thermoforming station. The core downstream sector is packaging, especially cups, boxes, lids, trays, fruit and vegetable boxes, meat trays, blister packaging, and stationery packaging related to food and daily chemicals. This extends to automotive parts, industrial sheets, consumer product casings, and some building and decorative panels. Upstream mainly includes PP, PE, PET, PLA resins and recycled bottle/sheet materials, as well as color masterbatches, impact modifiers, anti-fogging/antistatic additives, etc. Midstream consists of complete production line integrators; downstream partners include sheet processing plants, thermoforming plants, food packaging plants, cup and tray manufacturers, automotive interior parts manufacturers, and industrial sheet processing plants. Gross profit margin is approximately 25%?35%.
