According to our (Global Info Research) latest study, the global PPSU market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Polyphenylsulphone (PPSU) is an amorphous plastic. This material combines a high melting temperature with quite a low moisture absorption. Furthermore, it has better impact strength and chemical resistance than PSU and PES from the polysulphone group. Apart from these characteristics, PPSU can be better sterilized with superheated steam than other members of this group of polymers, and is resistant to detergents and disinfectants.

Global PPSU key players include Solvay, BASF, Quadrant, Ensigner, etc.

This report is a detailed and comprehensive analysis for global PPSU market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
