## Abstracts

According to our (Global Info Research) latest study, the global PR Writing Services market size was valued at US\$ 6565 million in 2025 and is forecast to a readjusted size of US\$ 14550 million by 2032 with a CAGR of 12.2% during review period.

Public relations writing services are the core business of professional institutions or individuals to provide strategic text creation and communication solutions for organizations/brands. Its essence is to achieve public relations goals through content management. The service content covers multiple genres such as press releases, media notices, social media copywriting, crisis statements, white papers, speeches, etc. It is necessary to combine communication theory (such as agenda setting, two-level communication) and brand communication strategy to ensure that the information is consistent with the company's positioning and adapts to the cognitive framework of the target audience. For example, crisis public relations statements must follow the '3T principle' (Tell Your Own Tale, Tell It Fast, Tell It All) to control the direction of public opinion through precise wording; while product promotion copywriting needs to integrate the 'anchoring effect' or 'loss aversion' principle in behavioral economics to design a language structure with behavioral guidance.
