Pre-Coated Bolts are fasteners treated with a layer of lubricant, adhesive, or anti-corrosion material applied during manufacturing to enhance performance and durability. The coatings can serve various purposes, such as reducing friction for easier assembly, preventing loosening under vibrations, sealing against leaks, or protecting against rust and wear in harsh environments. Commonly used in industries like automotive, construction, and heavy machinery, pre-coated bolts eliminate the need for additional treatments during installation, improving efficiency, consistency, and reliability in critical applications.
